

# Diseases and Conditions Reportable In Missouri (19 CSR 20-20.020)

Numbers in parenthesis represent ICD-9 and ICD-10 Codes

**Report Diseases and Conditions to your local health agency or to:**  
Missouri Department of Health and Senior Services during business hours 573-751-9071, after hours  
and on weekends 800-392-0272 or by fax 573-751-6417

**1. Category I diseases or findings shall be reported to the local health authority or to the Department of Health and Senior Services within twenty-four (24) hours of first knowledge or suspicion by telephone, facsimile or other rapid communication.**

**Category I diseases or findings are—**

**(A) Diseases, findings or agents that occur naturally or from accidental exposure:**

- Animal (mammal) bite, wound, humans
- Diphtheria (032, A36)
- Escherichia coli O157:H7 (008.04, A04.3)
- Escherichia coli, shiga toxin positive, serogroup non-O157:H7 (008.04, A04.3)
- Haemophilus influenzae, invasive disease (038.41, 041.5, 320.0, A41.3, J14, G00.0)
- Hantavirus pulmonary syndrome (079.81, 480.8, B33.8)
- Hemolytic uremic syndrome (HUS), post-diarrheal (283.11, D59.3)
- Hepatitis A (070.0, 070.1, B15)
- Influenza—associated public and/or private school closures
- Lead (blood) level greater than or equal to forty-five micrograms per deciliter ( $\geq 45$   $\mu\text{g/dl}$ ) in any person equal to or less than seventy-two ( $\leq 72$ ) months of age
- Measles (rubeola) (055, B05)
- Meningococcal disease, invasive (036, A39)
- Outbreaks (including nosocomial) or epidemics of any illness, disease or condition that may be of public health concern
- Pertussis (033.0, A37.0)
- Poliomyelitis (045, A80)
- Rabies, animal or human (071, A82)
- Rubella, including congenital syndrome (056, 771.0, B06, P35.0)
- Severe Acute Respiratory Syndrome-associated Coronavirus (SARS-CoV) Disease (480.3, J12.8)
- Shiga toxin positive, unknown organism (005.8, 005.9, A04.8, A04.9)
- Shigellosis (004, A03)
- Streptococcus pneumoniae, drug resistant invasive disease (038.2, 481, 482.3, A40.3, J13)
- Syphilis, including congenital syphilis (090, 093-097, A50-A52)
- Tetanus (037, A35)
- Tuberculosis disease (010-018, A15-A19)
- Typhoid fever (Salmonella typhi) (002.0, A01.0)
- Vancomycin-intermediate Staphylococcus aureus (VISA), and Vancomycin-resistant Staphylococcus aureus (VRSA) (038.11, 041.11, A41.0, A49.0)

**(B) Diseases, findings or agents that occur naturally or that might result from a terrorist attack involving biological, radiological, or chemical weapons:**

- Adult respiratory distress syndrome (ARDS) in patients under 50 years of age (without a contributing medical history)

- Anthrax (022, A22)
- Botulism (005.1, A05.1)
- Brucellosis (023, A23)
- Cholera (001, A00)
- Encephalitis/meningitis, Venezuelan equine (066.2, A92.2)
- Glanders (024, A24.0)
- Hemorrhagic fever (e.g., dengue, yellow fever) (060, 065, 078.6, 078.7, A91, A92.0, A95, A96, A98, A99)
- Plague (020, A20)
- Q fever (083.0, A78)
- Ricin (988, T62)
- Smallpox (variola) (050, B03)
- Staphylococcal enterotoxin B (988, T62)
- T-2 mycotoxins (989.7, 989.9, T64)
- Tularemia (021, A21)

**(C) Diseases, findings or adverse reactions that occur as a result of inoculation to prevent smallpox, including but not limited to the following:**

- Accidental administration
- Accidental implantation (inadvertent autoinoculation)
- Bacterial infection of site of inoculation
- Congenital vaccinia
- Contact vaccinia (i.e., vaccinia virus infection in a contact of a smallpox vaccinee)
- Eczema vaccinatum
- Erythema multiforme
- Generalized vaccinia
- Post-vaccinal encephalitis
- Progressive vaccinia (vaccinia necrosum, vaccinia gangrenosa, disseminated vaccinia)
- Vaccinia keratitis

**2. Category II diseases or findings and their reporting requirements are —**

**(A) Category IIA diseases or findings shall be reported to the local health authority or the Department of Health and Senior Services within three (3) days of first knowledge or suspicion. Category IIA diseases or findings are —**

- Acquired immunodeficiency syndrome (AIDS) (042, B20)
- Arsenic poisoning
- Blastomycosis (116.0, B40)
- California serogroup viral encephalitis/meningitis (062.5, A83.5)
- Campylobacteriosis (008.43, A04.5)
- Carbon monoxide poisoning
- CD4+ T cell count
- Chancroid (099.0, A57)
- Chemical poisoning, acute, as defined in the most current ATSDR CERCLA Priority List of Hazardous Substances; if terrorism is suspected, refer to subsection (1)(B)
- Chlamydia trachomatis infections (099.8, A56)
- Coccidioidomycosis (114, B38)

(Continued on page 2)

## Diseases and Conditions Reportable In Missouri (19 CSR 20-20.020)

Numbers in parenthesis represent ICD-9 and ICD-10 Codes

**Report Diseases and Conditions to your local health agency or to:**  
Missouri Department of Health and Senior Services during business hours 573-751-9071, after hours  
and on weekends 800-392-0272 or by fax 573-751-6417

### 2. Category II diseases or findings and their reporting requirements are –

**(A) Category IIA diseases or finding shall be reported to the local health authority or the Department of Health and Senior Services within three (3) days of first knowledge or suspicion.**

**Category IIA diseases or findings are—**

- Creutzfeldt-Jakob disease (046.1, A81.0)
- Cryptosporidiosis (007.4, A07.2)
- Cyclosporiasis (007.5, A07.8)
- Eastern equine viral encephalitis/meningitis (062.2, A83.2)
- Ehrlichiosis, human granulocytic, monocytic, or other/unspecified agent (082.40, 082.41, 082.49, A79.8, A79.9)
- Giardiasis (007.1, A07.1)
- Gonorrhea (098.0-098.3, A54.0-A54.2)
- Hansen's disease (Leprosy) (030, A30)
- Heavy metal poisoning including, but not limited to, cadmium and mercury
- Hepatitis B, acute (070.20, 070.21, 070.30, 070.31, B16)
- Hepatitis B, chronic (070.22, 070.23, 070.32, 070.33, 070.42, 070.52, B18.0, B18.1)
- Hepatitis B surface antigen (prenatal HBsAg) in pregnant women (070.20-070.23, 070.30-070.33, 070.42, 070.52, B16, B18.0, B18.1)
- Hepatitis B Virus Infection, perinatal (070.20-070.23, 070.30-070.33, 070.42, 070.52, B16, B18.0, B18.1)
- Hepatitis C, acute (070.41, 070.51, B17.1)
- Hepatitis C, chronic (070.44, 070.54, B18.2)
- Hepatitis non-A, non-B, non-C (070.9, B19)
- Human immunodeficiency virus (HIV)-exposed newborn infant (i.e., newborn infant whose mother is infected with HIV)
- Human immunodeficiency virus (HIV) infection, as indicated by HIV antibody testing (reactive screening test followed by a positive confirmatory test), HIV antigen testing (reactive screening test followed by a positive confirmatory test), detection of HIV nucleic acid (RNA or DNA), HIV viral culture, or other testing that indicates HIV infection
- Human immunodeficiency virus (HIV) test results (including both positive and negative results) for children less than two (2) years of age whose mothers are infected with HIV
- Human immunodeficiency virus (HIV) viral load measurement (including nondetectable results)
- Hyperthermia
- Hypothermia
- Lead (blood) level less than forty-five micrograms per deciliter ( $<45 \text{ } \mu\text{g/dl}$ ) in any person equal to or less than seventy-two ( $\leq 72$ ) months of age and any lead (blood) level in persons older than seventy-two ( $>72$ ) months of age
- Legionellosis (482.84, A48.1, A48.2)

- Leptospirosis (100, A27)
- Listeriosis (027.0, 771.2, A32, P37.2)
- Lyme disease (088.81, A69.2)
- Malaria (084, B50-B54)
- Methemoglobinemia, environmentally-induced
- Mumps (072, B26)
- Mycobacterial disease other than tuberculosis (MOTT) (031, A31)
- Occupational lung diseases including silicosis, asbestosis, byssinosis, farmer's lung and toxic organic dust syndrome
- Pesticide poisoning
- Powassan viral encephalitis/meningitis (063.8, A84.8)
- Psittacosis (073, A70)
- Respiratory diseases triggered by environmental contaminants including environmentally or occupationally induced asthma and bronchitis
- Rocky Mountain spotted fever (082.0, A77.0)
- Saint Louis viral encephalitis/meningitis (062.3, A83.3)
- Salmonellosis (003, A02.0)
- Streptococcal disease, invasive, Group A (041.01, 034.1, A40.0, A49.1, A38)
- Streptococcus pneumoniae, invasive in children less than five (5) years (038.2, 481, 482.3, A40.3, J13)
- Toxic shock syndrome, staphylococcal or streptococcal (785.5, A48.3)
- Trichinosis (124, B75)
- Tuberculosis infection (795.5, R76.1)
- Varicella (chickenpox) (052.1, 052.7, 052.8, 052.9)
- Varicella deaths (052, B01)
- West Nile fever (066.4, A92.3)
- West Nile viral encephalitis/meningitis (066.4, A92.3)
- Western equine viral encephalitis/meningitis (062.1, A83.1)
- Yersiniosis (008.44, A04.6)

**(B) Category IIB diseases or findings shall be reported directly to the Department of Health and Senior Services weekly. Category IIB diseases or findings are:**

- Influenza, laboratory-confirmed (487, J10)

**(C) Category IIC diseases or findings shall be reported directly to the Department of Health and Senior Services quarterly. Category IIC diseases or findings are:**

- Methicillin-resistant Staphylococcus aureus (MRSA), nosocomial
- Vancomycin-resistant enterococci (VRE), nosocomial

The reporting rule can be accessed at:
